

# MODEL - MTB 4

For the broad mid-range e-bike segment this is a bicycle in the absolute high end in terms of quality.

When developing this e-bike all details have been considered and nothing left to coincidence. Also, it has been carefully built using our strongest and most reliable center motor with integrated torque sensor and controller.

The model comes off the shelf with the Suntour SF 15-XCR 32 suspension fork, the Shimano 10 speed Deore gears and strong Shimano Disc brakes. To complete the bike, it also races away on the Schwalbe Tough Tom Rapid tires as well as we fitted it with our premium LCD center display.

All left to say is, *enjoy the ride!*

## DT1 SYSTEM

8.8 Ah 10.4 Ah or 13.4 Ah  
Range up to 100 km

## SPECIFICATIONS

<b>Frame</b>	MTB, Alloy 6001
