

MODEL - CITY 4

The City 4 combines all the best qualities from Promovec's many years of research in the riding experience. The design is based on a no-frills philosophy so only those details and components that add to the comfort for the rider are integrated. Therefore, the model is fitted with a semi-enclosed chain guard, 7 speed Shimano coaster gears, LED display with walkassist and light as well as our 250W/36V front motor.

The combined selection of components makes the City 4 a well-balanced and perfect e-bike for everyday use.
